Summary:

Experienced Java Developer with a passion for creating efficient and scalable software solutions. Adept at collaborating with cross-functional teams to analyze, design, and implement innovative applications. Proven track record of delivering high-quality code on time and within budget. Committed to continuous learning and staying updated on the latest technologies.

Skills:

- **Programming Languages:** Java, JavaScript
- **Frameworks:** Spring Boot, Hibernate
- **Web Technologies:** HTML, CSS, jQuery
- **Database:** MySQL, MongoDB
- **Version Control:** Git
- **Tools:** Maven, Gradle
- **Testing:** JUnit, Mockito
- **IDE:** IntelliJ IDEA, Eclipse
- **Agile/Scrum:** Experience working in Agile development environments

Professional Experience:

Java Developer | XYZ Tech Solutions, City, State | Month Year - Present

Collaborated with a team of developers to design and implement new features for a customer relationship management (CRM) system using Java and Spring Boot. Optimised existing codebase, resulting in a 20% improvement in application performance. Conducted code reviews and provided constructive feedback to team members, ensuring code quality and adherence to coding standards. Worked closely with QA teams to identify and resolve software defects.

Software Engineer | ABC Software, City, State | Month Year - Month Year

Developed and maintained backend services for a cloud-based inventory management system using Java and Hibernate.

Implemented RESTful APIs to facilitate communication between different modules of the application.

Collaborated with front-end developers to integrate user interfaces with backend services.

Participated in the full software development lifecycle, from requirements analysis to deployment and support.

Education:

Bachelor of Science in Computer Science | University of XYZ, City, State | Graduation Year

Relevant coursework: Data Structures, Algorithms, Software Engineering

Projects:

Online Bookstore Application | GitHub: github.com/alansmith/bookstore-app

Developed a Java-based online bookstore application with Spring Boot and Thymeleaf.

Implemented user authentication, product catalogue, and shopping cart functionalities.

Integrated payment gateway for secure online transactions.

Employee Management System | GitHub: [github.com/#](#)

Created a Java application to manage employee records using Spring MVC and Hibernate.

Designed a responsive web interface for easy data entry and retrieval.

Implemented role-based access control for secure data management.

Certifications:

Java SE 8 Programmer Certification

Spring Framework Certification
